CONVENIENT • EFFICIENT • EASILY CLEANED • CUTS WINTER FLOOR MAINTENANCE

overshoe racks

For schools, churches,
clubs, public buildings,
institutions,
apartments,
offices, arenas

CONSTRUCTION FEATURES

- sturdy weight shelves of rust-resistant zinc-coated steel
- shelves fold up neatly when not in use
- strong welded construction
- designed and built to stand rough usage
- smooth baked enamel finish
- shelves easily removable for cleaning purposes
- wall mounted, free-standing and mobile units as well as a portable unit

Installed near entrance areas of a building, **Shanahan's Overshoe Racks** provide the perfect solution to wet, dirty, tracked-up floors and excessive floor maintenance. The drip of melting snow and slush on outdoor footwear stays on the shelves which are pan shaped for this purpose.

A TYPE FOR EVERY APPLICATION

Three types for major storage are available: the wall units, shown here, illustrate shelves both folded down, ready for use and folded back when not in use; floor and mobile units are shown on the opposite page; a small portable unit is available for use when traffic flow is limited.

NO MAJOR SPACE PROBLEM

Some architects include areas for such equipment in their plans, with wall units on the walls, and floor, or mobile units in the central core of the area. In older buildings there is generally corridor space to accommodate the number of units required.

Standard Sizes of Units

WIDTHS

(Centre-to-centre of posts)
No. 48W: 48" Wall Unit
No. 48F: 48" Floor Unit
No. 48M: 48" Mobile Unit
No. 34W: 34" Wall Unit
No. 34F: 34" Floor Unit

OVERALL HEIGHTS

Wall Unit: 4'11" (from top of baseboard)
Floor Unit: 5'3"
Mobile Unit: 5'7"

DEPTH

Wall Unit: 41/2" with shelves folded, 14" with shelves in use
Floor and Mobile Units: both occupy floor space of approximately 2'4"x4'2"

NUMBER OF SHELVES

Wall Unit: 4 shelves per unit
Floor and Mobile Units: 8 shelves per unit.

overshoe racks

MOBILE UNIT

This unit is substantially the same as the Floor Unit with the addition of essential bracing and smooth-rolling 3" casters.

It is easily moved from storage area to entrance area in the bad weather season.

PORTABLE UNIT

Portable Overshoe Rack for use in offices where traffic is limited.

This handy portable unit is designed for reception areas in offices and plants where storage requirements are limited. Does away with messy makeshift methods, keeps area neat, clean and attractive. Invites good habits. Shelves are 33" wide. The unit stands about 21" high and occupies a space about 34" by 15". Shelves may be folded when not in use. Each shelf comfortably accommodates three pairs of overshoes. The unit is attractively finished in beige and charcoal.

Unit can easily be stored away during the dry weather season or can be used as a decorative piece to hold potted plants, magazines or literature.

FLOOR UNIT

With shelves on either side, the free-standing floor anchored unit provides space for approximately 48 to 50 pairs of rubbers or overshoes. As with wall unit, shelves fold neatly back when not in use.

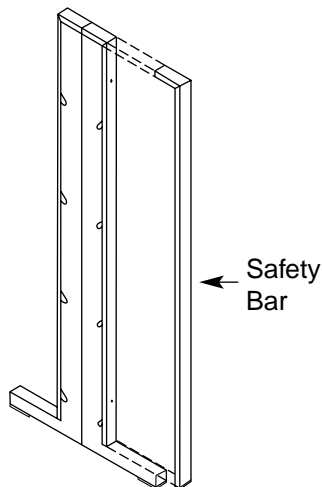

OTHER ADVANTAGES

Shanahan's Overshoe Racks are compact and neat looking. Made of steel, they won't warp, shrink, splinter or snag clothing. The durable baked enamel finish stands up to years of use. No need to refinish from season to season. Because shelves are removable, they are easy to hose out or wash, easy to keep clean with a minimum of labour. Shelves fold neatly up and out of the way when not in use and because of their removable feature, they can be reversed and used as a magazine or literature display rack when not in use for their original purpose.

OPTIONAL:

Bootrack Safety Bar
Fabricates from 20 gauge galvaneal zinc-coated steel, screw mounted and finished with a high quality alkyd baked enamel. (Stainless steel finish also available).

Bootrack Post Caps
Tops of post standard can be closed to prevent foreign objects from being dropped down the hollow post interior.

SPECIFICATION

Shelves
Bootrack shelves to be fabricated from min. 18 gauge galvaneal zinc-coated steel.

Posts
Bootrack posts to be fabricated from min. 16 gauge galvaneal zinc-coated steel.

Finish
Bootrack shelves and posts to be finished with a high quality alkyd baking enamel of not less than 1 ml thickness. 18 standard colors & 12 designer colors - available at no additional charge.
